

About this Course

Prerequisite

The Introduction to Lifestyle Redesign® is a prerequisite to the other courses in the Life Management Series, and must be completed first.

Schedule

Sign-in begins 30 minutes before the start of the course (8:30 am sign in, 9:00 am course).

Breaks

There are two 15 minute breaks, one in the morning, one in the afternoon, at appropriate times. There is a one hour lunch period, with lunch on your own.

CEU Credit

Participants must sign in and out. Participants must complete a learning outcomes and course evaluation in order to receive a certificate of completion. Certificates will be available at the end of the course. Participants not fulfilling these requirements will not receive a certificate. Keep a copy of the brochure and certificate for your records.

Cancellation Policy

A refund, less \$50 administrative fee, will be made if a cancellation notice is received 10 business days prior to the first course date. Cancellation by instructors will result in full refund.

Special Needs Requests

If you require ADA accommodations, please contact us at (323) 442-2811 at least two weeks before the course date for arrangements.

About the Presenter

Chantelle Rice, OTD, OTR/L, CDE is the director of the USC Occupational Therapy Faculty Practice, the USC Chan Division's private clinic where occupational therapists deliver lifestyle-based interventions to patients with a variety of medical diagnoses and conditions. A Certified Diabetes Educator®, she works predominantly with Lifestyle Redesign® Weight Management and Diabetes Management clients while also managing the practice's administrative operations.

Dr. Rice received her bachelor's and master's degrees in occupational therapy from USC in 2008, and earned her Doctorate of Occupational Therapy degree from USC in 2009.

Audience

This course is designed for OTs, OTAs, and others as an introductory level course; however, all levels of experience are welcome as are all areas of practice.

The assignment of AOTA CEUs does not imply endorsement of specific course content, products, or clinical procedures by AOTA.

Life Management Series

Lifestyle Redesign® for Weight Management, Diabetes and Related Co-morbid Conditions

January 19, 2018

8:30 am—4 pm

University of Southern California
Health Sciences Campus
Center for Health Professions
1540 Alcazar St., Room 106
Los Angeles, CA 90033

Course Description

This course provides you with the knowledge and tools to implement an occupational therapy intervention for the prevention and/or management of overweight/obesity, bariatric surgery, diabetes/pre-diabetes, hypertension, hypercholesterolemia and other related diagnoses. This course provides detailed intervention materials and case studies to use in conjunction with the Introduction to Lifestyle Redesign® methodology course.

Learning Objectives

Participants will:

- Design occupational therapy interventions for patients with overweight/obesity, bariatric surgery, diabetes/pre-diabetes, hypertension, hypercholesterolemia and other related diagnoses
- Define the role of occupation in a weight loss/behavior modification intervention
- Explain the following topics and integrate this knowledge into treatment: how macronutrients impact blood sugar management, how the timing, quality and quantity of food choices impact overweight/obesity, and how self-care behaviors influence the management of the chronic diseases listed above
- Utilize treatment activities and ideas given in the course for these populations
- Analyze relevant documentation, billing and reimbursement issues when treating obesity and related diagnoses
- Discuss best practice for interdisciplinary work with these patient populations

Program Content

- Occupation-centered interventions for weight loss and related conditions
- Interfacing with other health professions when treating patients with these diagnoses
- Evidence-based knowledge component necessary for successful intervention such as:
 - Daily rhythms and routines that promote healthy weight and prevent/mitigate associated chronic conditions
 - Engagement in meaningful activity as strategy to increase engagement in health behaviors and to prevent overeating
 - Stress, sleep and routine and their impact on weight management
 - The role of carbohydrates in blood sugar management and weight loss
 - The role of fats and how they impact cholesterol and risk for heart disease
 - Physical activity and how it impacts weight loss and diabetes
- Case studies of OT interventions for obesity, diabetes, hypertension, bariatric surgery, behavioral health co-morbidities, weight gain secondary to stress and anxiety
- Billing and reimbursement

Other courses in the Life Management Series:

- ◆ Lifestyle Redesign® for Chronic Pain and Headache Management
 - ◆ Biopsychosocial Dimensions of Creating Life Balance
- ◆ Lifestyle Redesign® for Individuals with Multiple Sclerosis
- ◆ Lifestyle Redesign® for Individuals with Autism Spectrum Disorder
