

# Lifestyle Redesign®

## FOR NEUROLOGICAL DISORDERS

---

**USC Occupational Therapists use Lifestyle Redesign® to help people create health-promoting habits and routines, and better manage their lives.**

### **We can help you:**

- Learn to conserve energy and pace activities to manage fatigue
  - Recognize and manage stress, anxiety, and depression
  - Create a restorative sleep routine to improve your energy
  - Learn and integrate techniques to manage cognitive changes
  - Develop self-monitoring routines to increase awareness of your symptoms and sustain lifestyle changes
  - Analyze your living spaces to minimize the risk of falling
  - Learn to use equipment for managing physical limitations and improving participation in daily activities
  - Develop sustainable routines around physical activity, eating, and fluid intake
- 

#### **How much time will this take?**

Sessions are typically held for 30-60 minutes, one time per week, in person or via telehealth. However, every person is different, so ask your OT about what frequency of sessions will work best for you.

#### **How much will this cost?**

We can do a complimentary insurance benefits check to tell you if OT sessions are covered by your plan and if any co-pays apply.
